

Understanding Levies in Strata Management

1. What are levies?

Levies are payments made by owners in a strata scheme to cover ongoing costs of managing the property, such as maintenance, insurance, and administration.

2. Types of levies

There are three main types: Administration Fund, Capital Works Fund, and Special Levies (for urgent or unexpected expenses).

3. How levies are calculated

Levies are generally based on unit entitlements and determined during the Annual General Meeting.

4. When and how to pay

Levies are typically paid quarterly. Payment can be made via bank transfer, direct debit, or other methods defined by the Owners Corporation.

5. Example breakdown

For a quarterly period: Admin Fund: \$400, Capital Works Fund: \$300, Total: \$700
